## Industrial Cleaners: Why They Are Critical for Manufacturing Facilities

Manufacturing facilities face challenges with accumulated oils, grease, and metal particles that can hinder equipment performance and safety. Industrial cleaners are specialized chemical solutions designed to remove these contaminants effectively, maintaining safe and efficient operations.

Industrial cleaners remove heavy contaminants from industrial surfaces.

### Common Environments

- machine shops
- automotive plants
- warehouses

### Importance

- Enhances equipment performance and reduces maintenance issues.
- Improves workplace safety by eliminating slip hazards.
- Maintains product quality by ensuring parts are clean before processes like welding.

### Types of Cleaners

- Alkaline for oils and machining fluids
- Solvent for heavy grease
- Neutral for general cleaning
- Acid for rust and mineral deposits

Effective use of industrial cleaners leads to improved efficiency, reduced downtime, and prolonged equipment life.

Metalloid offers an extensive range of cleaning products. To explore our full selection, please visit [www.metalloidcorp.com](http://www.metalloidcorp.com).
